

How can I keep regulatory initiatives in line with my goals and budget while still remaining compliant?

What steps can I take to be prepared for Meaningful Use Stage 3, HIPAA, MACRA, and Meaningful Use Audits?

How can I be ready for new payment models to maximize reimbursements?

himformatics

We help you understand, plan for and meet changing regulatory and compliance requirements and use your technology to keep patients healthy, reimbursements strong, providers engaged and operations efficient.

Regulatory and Compliance

Simplifying the complex.

Ensure patients remain your priority.

Meaningful Use, MACRA (MIPS/APM) and other regulatory initiatives can be confusing and overwhelming to caregivers and administrators alike. Our team of experts can show you how to stay focused on your patients while helping you understand, prepare for and leverage current and future regulatory programs to deliver better care while maximizing reimbursement. We help you build the strategies, plans, tools and infrastructure you need to engage patients and give them access to the right data to manage their health while ensuring you can accurately capture the data needed to report on the quality of their care and the outcomes.

Be prepared.

Audits are inevitable.

Meaningful Use audits, much like HIPAA audits, have become a matter of “when” rather than “if.” We help make sure you are prepared by developing comprehensive, written workflow policies and detailing the actions your organization will take when the audit occurs. In fact, we can help you build and document those workflows in the first place. We can also help you get all the right people around the table to understand the impact of new and changing regulations to each area of your operations and recommend a course of action to make sure everyone — including the business — is ready.

Anticipating tomorrow.

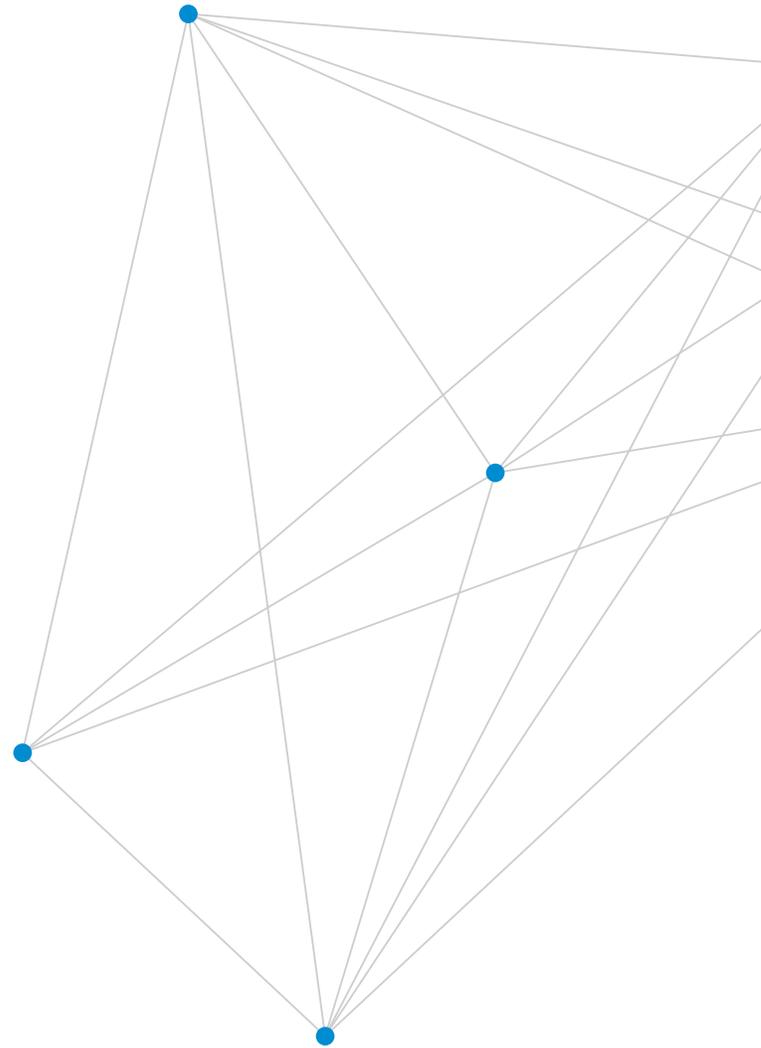

Addressing regulations, remaining compliant for the long term.

As Meaningful Use Modified Stage 2 transitions to Stage 3, you can make it part of an overall strategy. We work with you to assess your current situation, analyze gaps and develop a practical plan to close those gaps, avoid penalties and achieve compliance at each stage. We also help you create or enhance your governance structure and strategy to handle changes in everything from population health management to quality of care initiatives and evolving reimbursement models that balance volume and value.

Regulatory and Compliance

Our Expertise

- Analytics and Data Governance
- Audit Readiness
- Collaboration Technologies
- Electronic Health Records selection
- Health Information Exchange (HIE)
- Patient Engagement
- Population Health Assessment, Planning and Implementation
- Technology Assessment and Optimization
- Seamless Transition through Meaningful Use Stages
- Infrastructure Security, Resilience and Scalability
- Workflows built around areas such as:
 - Clinical Flow
 - Computerized Physician Order Entry (CPOE)
 - Revenue Cycle
 - Governance Infrastructure

Why Himformatics?

We ask “Why?”

We help you achieve your goals — and can even help you figure out what they are.

Rather than chasing the latest trend, we ask tough questions upfront to understand what you need to accomplish, why and when. We can help with everything from IT assessment and strategy to vendor selection, implementations, training, and measurement.

We get in the trenches.

We work shoulder to shoulder to get the job done.

Your organization is unique. Your strategy and tactics should be, too. We first understand how your organization works, where the biggest challenges to achieving your goals are, and how to address them.

We know healthcare and IT.

We apply years of lessons learned to help you succeed.

Many of us have held leadership positions in healthcare organizations and understand the challenges you face. We are uniquely positioned to apply both business understanding and technical knowledge to your situation.

Core Competencies

- Strategy and Assessment
- Program and Project Management
- Workflow and Operational Improvement
- Implementation and Design
- Informatics
- Contract Reviews and Negotiations

Focus Areas

- Business Intelligence and Analytics
- Clinical Optimization and Process Redesign
- Health Data Exchange and Interoperability
- IT Strategy and Performance
- Physician Practice Integration
- Population Health Management
- Regulatory and Compliance
- Revenue Cycle Optimization and Process Redesign
