

Jim Gaddis

Partner
Himformatics LLC

Jim Gaddis is an experienced information (IT) healthcare consulting leader with more than 30 years of experience in health delivery, health plan, and vendor and provider organizations. He works with clients to deliver better care while delivering better operational performance.

Jim's expertise includes IT strategy, business process redesign, ambulatory electronic medical records, provider and patient digital engagement strategies and solutions, quality and productivity reporting, financial modeling, and return on investment (ROI) from clinical and administrative systems. In fact, Jim conceptualized and created innovative ROI calculators and tools that help healthcare organizations, professional societies and vendors make healthcare IT investment decisions.

As a licensed paramedic, Jim spent a decade in care delivery in the pre-hospital and critical care settings, and two more decades in healthcare information technology consulting. He has amassed deep knowledge of Internet-enabled solutions in healthcare, and strong skills in strategy development, cost-benefit calculations, physician credentialing and privileging, occupational health, medical management and physician data management, as well as project experience with clinical trials in pharmaceuticals and oncology.

Before Himformatics, Jim handled vendor research on ambulatory electronic medical records and led the eHealth Strategy practice for a large national consultancy. He was also with First Consulting Group (now CSC), Andersen Consulting (now Accenture), Asante Health Systems and several pre-hospital care provider organizations.

Jim earned his MBA in Information Systems and Finance from the University of Rochester, and his bachelor's degree from Southern Oregon University. He is a Fellow at the Healthcare Information Management Systems Society (HIMSS), where he served as Chair of the Meaningful Use Center of Excellence in 2010-2011, and a frequent presenter and participant in state and national healthcare conferences and initiatives.

About Himformatics Himformatics harnesses IT and business expertise to help clients deliver healthcare in a way that makes a difference. From strategy to implementation, our select team of consultants specializes in getting the most value from IT to improve clinical processes and financial performance, and ensure regulatory compliance. Our expertise spans a range of comprehensive and specialized services for healthcare organizations big and small. We draw on our decades of experience to earn a place as a trusted adviser to your business, and we thrive on delivering exceptional service and results.
